Agenda

- Background
- Status
- Challenges
- Contractor Performance Assessment Reporting System

Contractor Performance Assessment Reporting System

- CPARS is to ensure that accurate data on contractor performance is current and available for use in source selections through the Past Performance Informational Retrieval System (PPIRS).
- Performance assessments will be used as a resource in awarding best value contracts and orders to contractors that consistently provide quality, on-time products and services that conform to contractual requirements.
- CPARS can be used to effectively communicate contractor strengths and weaknesses to source selection officials.
